QUALITY VEGETABLE PLANTS

OMEGA, GEORGIA

*"Grown in Nature's Own Greenhouse"*

OMEGA PLANT FARMS

OMEGA GEORGIA

E. L. POWELL, 1917

E. L. POWELL, 1942

In 1917, the year I started growing plants, it was my privilege to serve my country in the armed forces in World War Number One.

In 1942 I am ready to do my part in winning World War Number two. I pledge my service and everything I possess to the Defense of my Country.

Realizing that food is one of the greatest factors in winning this war and knowing that field grown vegetable plants produce larger yields, I am devoting my time and everything at my command to the growing and shipping of more and better vegetable plants until the time I can be of greater service to my Country.

Sincerely yours,

E. L. Powell, Sec.-Treas.

OMEGA PLANTS FARMS, INC.,

**OMEGA PLANT FARMS**

**OMEGA GEORGIA**

## TO THE TRADE

Our southern field grown vegetable plants have made both yield and quality winners in tests with cold frame and hot-bed plants.

In our twenty-five years experience growing and shipping plants we have learned where to get the best seed, how to grow and pack plants so they can be shipped to any state in growing condition and give satisfaction in every particular.

—V—

We do not list all varieties but devote all our energies to a small line of leaders and specialize in top notch producers of profitable crops.

We have the land, equipment and a large force of experienced men for growing and handling plants properly and we know our service is second to none, regardless of the size of your order.

—V—

**OUR GUARANTEE**—Knowing that seed or plants of the highest quality will often fail through improper treatment due to several reasons, we will not be responsible for the crop. However, we will refill free of charge or refund purchase price on any order of plants not entirely satisfactory, provided you notify us within ten days from receipt of plants. In no case will we be responsible for any amount greater than the purchase price.

—V—

**HOW TO ORDER PLANTS**—All plants are sold on a cash basis. Make remittance by postoffice or express money order, draft or check. This will save extra cost to you in making collections and returning money to us by postoffice or express companies. However, we will make shipment C. O. D. if you prefer them that way. **BE SURE TO STATE DATE YOU WANT SHIPMENT MADE.**

—V—

### WHAT TO DO WHEN PLANTS ARRIVE

Open immediately and take a few bundles from center of crate. If weather conditions are unfavorable for trans-planting to fields place in cool place, keeping roots moist and tops dry—or trench out thinly, keeping plenty of moisture to roots and tops dry.

To better serve our trade we have two growing stations,

**Fort Meade, Fla. and Omega, Ga.**

**Send all orders to Omega, Ga.**

---

**THE QUICKEST WAY TO MAKE VEGETABLES IS TO SET OUR OPEN FIELD GROWN PLANTS.**

## Frost Proof Cabbage Plants

OUR FROST PROOF CABBAGE PLANTS are grown in the open fields and have been known to stand a temperature of 14 degrees above zero here without injury. They can be set much earlier than hot-bed, or cold-frame plants. The tops will not make much growth during the cold weather, but the roots will develop and have a good root system, and when the weather opens up they will make hard headed cabbage much earlier than hot-bed or home grown plants.

Realizing that market gardeners and large commercial growers must have true to type varieties we buy only reliable seed and get these a year in advance and test a sample from each bag to be sure our plants are true to type and can assure you that you will get varieties ordered.

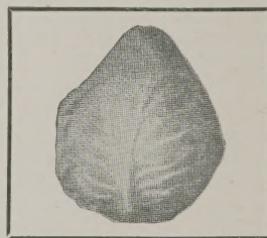

### WE CAN SUPPLY THE FOLLOWING VARIETIES

**EARLY JERSEY WAKEFIELD, 63 Days**—Best early and extensively used for home and market. Firm pointed heads with few outside leaves.

Early Jersey Wakefield

**CHARLESTON WAKEFIELD, 72 Days**—Larger and less pointed than Early Jersey, and about ten days later.

Charleston Wakefield

**GOLDEN ACRE, 63 Days**—Earliest round head variety, little smaller than Copenhagen Market and about a week to ten days earlier.

Golden Acre

**COPENHAGEN MARKET, 72 Days**—Early round headed variety, popular in all markets, very firm and of the highest quality.

**EARLY ROUND DUTCH, 76 Days**—An excellent early cabbage producing firm round heads and much harder than Copenhagen varieties.

**GLORY OF ENKHUIZEN, 80 Days**—Attractive medium early large, round and solid.

**ALL SEASON, 85 Days**—A desirable variety for early or late use. Very large flat heads.

**EARLY FLAT DUTCH, 83 Days**—Sure-heading compact and early. Heads flattened and solid.

---

THE QUICKEST WAY TO MAKE VEGETABLES IS TO SET OUR  
OPEN FIELD GROWN PLANTS.

# Yellow Resistant Cabbage

**YELLOW RESISTANT CABBAGE** was developed by Wisconsin Agriculture Experiment Station and cabbage can now be grown in localities where infested "Cabbage Yellow" soil prevented regular varieties from producing a crop. If you are in a section so infested we recommend the following varieties. These varieties for shipment—March April, May and June.

**JERSEY QUEEN, 68 Days**—An early pointed type yellow resistant strain used in place of Jersey Wakefield.

**RACINE MARKET, 67 Days**—Yellow Resistant. —Golden Acre type and about one week later than regular Golden Acre.

**MARION MARKET, 75 Days**—Yellow Resistant Copenhagen Type—About ten days later than Racine Market.

**Globe, 85 Days**—Yellow Resistant Glory of ENKHUIZEN.

**WISCONSIN ALL SEASON, 84 Days**—One of the hardest cabbage grown, making large flat heads and is much in demand for making kraut.

**WISCONSIN HOLLANDER No. 8, 115 Days**—A late yellow resistant strain of Danish Ball Head type. Splendid late for storage, shipping or kraut manufacturing.

## A WORD ABOUT COMPETITIVE PRICES

We bought the best cabbage seed available paying double the price a number of good seed growers were asking for same varieties. We have cultivated, sprayed and irrigated our fields and learned years ago the best in seed or plants always cost less. Comparing quality we are never undersold.

## Onion Plants

The demand for onion plants has increased each year and today we supply millions of these to home and market gardeners. They make larger yields and smoother onions that keep better than those grown from sets.

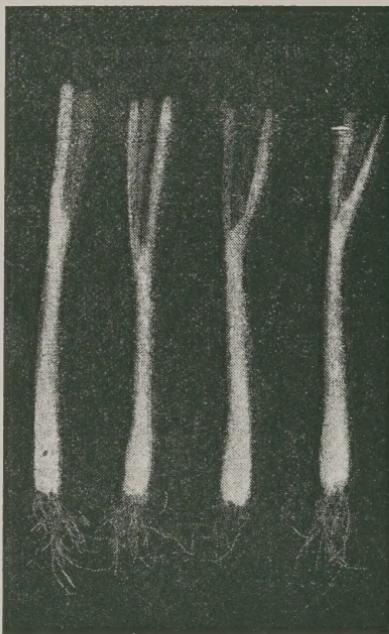

**CRYSTAL WHITE WAX**—This is a very popular variety, an absolutely pure white onion of waxy appearance. The sweetest and mildest of all the Bermuda Onions. There is a good demand for this on account of its handsome appearance.

**WHITE OR YELLOW**—This is a straw colored variety, exceedingly mild in flavor and very early. A very profitable variety for market, gardeners and truckers.

**PRIZETAKER**—This variety is a famous variety all over the

Proper Depth for  
Setting Onion Plants

country, for producing large onions. They are straw color, extremely mild flavor and good keepers.

**RIVERSIDE SWEET SPANISH**—Sparkling white flesh. Mild, sweet, good quality and splendid keepers.

## **Tomato Plants**

Omega Brand tomato plants are grown in the open fields in Nature's Own Greenhouse and make strong, stocky plants with a well developed root system. They are not frost-proof but are much hardier, stronger and start growing much quicker than tender seedlings or plants from a greenhouse.

The 1940 report of Pennsylvania Ten Ton Tomato Club shows seven out of nine winners used Georgia or Southern field grown tomato plants. The 1939 and 1940 report of the New Jersey Ten Ton Tomato Club shows the three winners in largest yield per acre and the three highest quality winners all used southern grown plants. Canners, commercial growers and market gardeners in all parts of the country report that OMEGA BRAND plants have given them larger yields, earlier maturity and a greater percentage of number one tomatoes.

All our tomato plants are grown from certified seed on new fields, cultivated, sprayed and irrigated (when necessary) under the supervision of a full time graduate Plant Pathologist.

All plants are carefully selected in fields or graded in packing houses and only seven to ten inch plants about the size of a cedar pencil are used.

Each bundle of 50 plants is carefully wrapped with roots in damp moss and guaranteed to reach you in good growing condition.

## Tomato Plants

We do not have transplanted or spotted tomato plants but a number of our customers report our plants have produced larger yields than spotted plants.

Shape  
of  
Fruit

**EARLIANA, 60 Days**—One of the earliest varieties grown, making large, well rounded fruit of deep scarlet red color.

**JOHN BAER, 66 Days**—Medium to large, round, scarlet-red fruit, smooth and firm. A good early variety.

**BONNY BEST, 66 Days**—A very popular early tomato for home and market. Scarlet-red fruit, flattened globe shape, vigorous grower with plenty of foliage.

**PRITCHARD (SCARLET TOPPER), 70 Days**—An ideal all-purpose tomato, wilt resistant, large producer of bright red globe shape, medium size and excellent quality.

**STOKESDALE, 70 Days**—A new variety developed by Francis C. Stokes. Early heavy yielder, deep red, globe shape, gaining in popularity with commercial shippers and canners.

**RUTGER, 74 Days**—A wilt resistant variety, vigorous grower with plenty of foliage, fruit globular shaped, bright red with heavy walls, small cells, a popular variety all over the United States.

**MARGLOBE, 73 Days**—This variety is recommended for its resistance to wilt and nail head rust. Fruits are medium size, smooth, red and globular shape. It is a good second early and continues to bear until frost.

**MASTER MARGLOBE, 73 Days**—The finest strain of Marglobe bred to produce heavy yields, perfectly shaped fruits.

**GREATER BALTIMORE 78 Days**—This variety is excellent for canning. Producing a large, solid, smooth fruit of bright red color and excellent quality.

**INDIANA BALTIMORE, 75 Days**—A select strain of Greater Baltimore preferred thru the middle west.

## OMEGA BRAND FIELD GROWN PLANTS

All Pepper Plants are open field grown, but are not frost-proof. Plants may be set in open earlier than hot-house plants, as they are hardened by March winds and have been known to withstand light frost.

## SWEET VARIETIES

**WORLD BEATERS**—One of the best of the larger peppers, fruits 5 inches long, 3 inches in diameter. Flesh mild and thick, deep red when ripe. Good shipper and very productive.

**RUBY KING**—Excellent for home, market, garden and shipping. About as large as World Beater, vigorous grower, very profitable. Deep green becoming bright red, mild, sweet, thick flesh.

**PIMENTO**—A small, mild pepper, glossy green when young, ruby red when ripe, excellent for stuffing and canning.

**CALIFORNIA WONDER**—This is a large thick meated sweet pepper which we recommend above all others. Vigorous growing plants making heavy yield of large blocky fruit 5 inches long and 4 inches wide.

## HOT VARIETIES

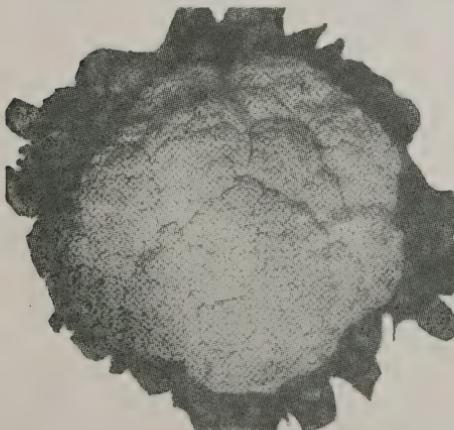

**LONG RED CEYENE**—This medium early pepper is long slender pointed, deep green when young and bright red when ripe, strong flesh and pungent.

**HUNGARIAN YELLOW WAX**—This early variety is larger than other hot peppers producing fruit 6 to 7 inches long and 2 inches in diameter. Excellent for canning. The color is waxy light yellow at first changing to orange and then to bright red.
